VIKTOR ANCHUTIN

DATA/ML ENGINEER

Kuala Lumpur, +60199719800, anchutin.v.a@gmail.com
viktor-anchutin

PROJECTS AND BLOG: viktoranchutin.github.io

Experienced software engineer trained in Data Science and Robotics

EXPERIENCE

Data Science training – University of Malaya, *Sept 2022 – Jan 2024*
Kuala Lumpur, Malaysia

- Multimodal deep learning research project, Pytorch
- Built a ETL pipeline for LLM application, Qdrant
- Recognized for outstanding work in Computer Vision by the instructor
- Leveraged Spark RDD to implement distributed machine learning algorithms in Scala
- Utilized Hadoop ecosystem to process and analyze data

Software Engineer, Search - Grid Dynamics, *May 2021 - Sept 2022*
Belgrade, Serbia

- Developed key stages of a serverless stream processing pipeline in AWS, reducing latency by 4x
- Developed critical microservices in AWS for a global retail giant, with10B+ requests/month
- Implemented features for the complex retail search engine, using Elastic Search and AWS

Java Software Engineer - X5 Group, *Dec 2019 - May 2021*
Moscow, Russia

- Led backend design for a major system at Russia's largest retail store, empowering nationwide managers to easily configure prices
- Developed a ETL pipeline with Spring Batch

Lead Robotics Developer - UVS YURION, *Oct 2018 - Dec 2019*
Moscow, Russia
Development of UAV navigation and control

- Solved a critical challenge in real-time altitude estimation for a UAV, by developing a sensor fusion algorithm in C++
- Developed a real-time control and monitoring system for UAV actuators in C and C++

SKILLS

Programming languages

Experienced: Java, Python, Kotlin, C

Familiar: Scala, C++, R

Machine learning

NLP (RAG, semantic search), Classical ML Algorithms, Model Evaluation, CNN, RNN, Transformers, CLIP, transfer learning, gradient accumulation

Tools: Pytorch, Scikit-learn, Pandas, Numpy, Huggingface

Data management

Data modeling, Hadoop ecosystem, Spark, SQL, PostgreSQL, DynamoDB, S3, Kafka, ElasticSearch, Qdrant

Software engineering

Docker, Backend development, Architecture Design, Concurrent programming, Algorithms, Testing

EDUCATION

Data science, M.S, University of Malaya, Kuala Lumpur, Malaysia
Sept 2022 - Jan 2024

Robotics, M.S, BMSTU, Moscow, Russia, *2016 – 2018*

Industrial Automation, B.S.E, MGSU, Moscow, Russia, *2012 - 2016*

COURSES ONLINE

LLM Bootcamp - The Full Stack, FSDL

Data Engineering, AWS Academy, 2023

Introduction to Designing Data Lakes on AWS, Coursera, 2023

Introduction to MLOps, 2023

Big Data Analysis with Scala & Spark, Coursera, 2022

Functional Programming In Scala, Coursera, 2022

AWS Solutions Architect, A Cloud Guru, 2022
